SUMMARY

I'm an Ambitious Java Developer versed in following established procedures and working under little or no supervision. Offering technical expertise in programming analysis, application analysis, and design. Excellent team player with in-depth knowledge of development tools and languages.

PROJECTS

1) Exam Portal Web-Application

- Technologies Used: **Angular, Angular Material, Bootstrap Grid, Java, Spring Boot, Hibernate, JWT Authentication, Spring Security, MySql**
- This website allows users to create an account and can sign in with their account. And at the time of registration, it will store the user data in the database. I used JWT authentication and spring security in the sign-in stage, so it will provide much more security to this website. On this website, two types of users can log in, i.e Admin User and Normal User. Admin users will responsible for performing all advanced operations i.e admin operations, and normal Users can take multiple types of exams and can perform other normal operations.

2) News WebSite

- Technologies used: **HTML5, CSS3, JavaScript, Bootstrap4, PHP, MySql**
- It's a News Website with account Security, normal user and admin user can log in to their account using usernames and passwords and perform other operations i.e Create New posts, Delete Old posts, Add Users, Delete Users, Create News Category, Delete News Category and Change Website Settings.

EXTRA CURRICULAR ACTIVITIES

- Participated in College festival during college annual day as a participant in 2018.
- I Organized many inter-college fests and college annual days as a coordinator in the third year during graduation in 2019...
- Participated in football sport during college in the third year of 2019.
- Served as a volunteer in NSS camp during graduation in the second year of 2019 and third year of 2020.
